📖 Part 1：双语精读对照

以下为本期男主播朗读的全部英文原文（共 6 节：Section 1–6），逐节配中文翻译。

1 Section 1

Hello, young explorers, and welcome back to Michael's Morning Listening! This is our twenty-fourth show! Today we meet a penguin that proposes with a pebble, and a koala whose **fingerprints**（指纹） look exactly like yours. A builder from Antarctica（南极）, and a fingerprint star from the treetops. Let's go!

你好，小小探险家们，欢迎回到 Michael 的早听晚读！这是我们的第二十四期节目啦！今天我们要认识一只用小石头"求婚"的企鹅，还有一只指纹和你的几乎一模一样的考拉。一位是来自南极的建筑师，一位是树梢上的指纹明星。出发吧！

2 Section 2

Our first hero lives in Antarctica, the coldest place on Earth. It is the Adélie（阿德利企鹅） penguin, a bird in a black-and-white **garment**（礼服） that looks like a suit. In spring, the males arrive first. They do not bring flowers. They bring pebbles! A male picks up a smooth stone in his beak and walks to a female, with **courage**（勇气）. If she likes his stone, she may place it in her nest. It looks like a proposal! Scientists watch from a boat, its **engine**（发动机） humming softly.

我们的第一位主角生活在南极——地球上最冷的地方。它就是阿德利企鹅，一种穿着黑白"礼服"、看起来像西装的鸟。春天一到，雄企鹅最先到达。它们不带花。它们带小石头！一只雄企鹅用喙叼起一块光滑的石头，鼓起勇气走向一只雌企鹅。如果她喜欢他的石头，就可能把它放进自己的巢里。这看起来就像求婚！科学家们坐在一艘小船上静静观看，小船的发动机发出轻柔的轰鸣声。

But the pebble is not just a pretty gift. It is the **primary**（主要的） building material of the nest. The pair builds a round nest of stones, and the nest keeps the eggs safe and dry. When snow melts, the water runs between the stones instead of flooding the nest. Sharp ice could **wound**（划伤） a chick's soft feet, so a dry nest matters. So the male is really saying, "Look, I can build a safe home!" Sometimes a male steals a stone from a neighbour's nest, and a fight **erupts**（打起来）!

但这块小石头可不只是一件漂亮的礼物。它是筑巢的主要建筑材料。这对企鹅用石头筑起一个圆圆的巢，巢能让蛋保持安全和干燥。积雪融化时，水会从石头缝里流走，而不是淹进巢里。锋利的冰面可能会划伤雏鸟柔软的小脚，所以一个干燥的巢非常重要。于是雄企鹅其实是在说："看，我能建一个安全的家！"有时候，一只雄企鹅会从邻居的巢里偷一块石头，于是就打起来了！

To everyone's **delight**（高兴）, the pair works together, taking turns on the eggs and fetching more stones. Their footprints **fade**（消失） in the snow, but their little stone nest stays. A penguin's proposal is not about a diamond ring. It is about teamwork and a safe place for babies to grow.

让所有人高兴的是，这对企鹅随后一起合作，轮流孵蛋、轮流找石头。它们的脚印消失在雪地里，但它们的小石头巢留了下来。企鹅的"求婚"与钻石戒指无关。它关乎合作，以及一个能让宝宝们安全长大的地方。

3 Section 3

Our second hero is the koala, a grey furry animal from Australia（澳大利亚）. It sleeps most of the day in a eucalyptus（桉树） tree, holding on tight. By **coincidence**（巧合）, a scientist who was holding a koala looked closely at its fingers — and got a big surprise. Under the soft **flesh**（皮肉） of its fingertips were tiny **ridges**（纹路）, loops, and whorls. They looked just like human **fingerprints**!

我们的第二位主角是考拉，一种来自澳大利亚的灰色毛茸茸的动物。它一天中的大部分时间都在桉树上睡觉，紧紧抱住树干。巧合的是，一位抱着考拉的科学家仔细看了看它的手指——结果大吃一惊。在它指尖柔软的肉里，有细小的纹路、箕形纹和斗形纹。它们看起来简直和人类的指纹一模一样！

The scientist studied the prints under a microscope, and the surprise grew bigger. Even experts could hardly tell a koala's print from a human's! How can this be? Humans and koalas are not close cousins at all. Yet both grew the same kind of skin on their fingers. Scientists call this convergent evolution: two different animals solving the same problem in the same way.

科学家在显微镜下研究这些纹路，惊讶更甚。连专家都几乎分不清考拉的指纹和人类的指纹！这怎么可能呢？人类和考拉根本不是近亲。然而，它们的手指上却长出了同一种皮肤。科学家把这叫做趋同进化：两种不同的动物，用同样的方式解决同一个问题。

For the koala, the grip is everything. Its **ridges** help it hold smooth branches and pick soft leaves, like your **fingerprints** help you hold a pencil. So when you press your finger on a window, imagine a koala doing the same in a tree. Two hands, two worlds — and almost the same print!

对考拉来说，抓握就是一切。它的纹路帮助它抓住光滑的树枝、摘取柔软的树叶，就像你的指纹帮助你握住铅笔一样。所以当你把手指按在窗户上时，想象一下，一只考拉正在树上做着同样的事。两双手，两个世界——指纹却几乎相同！

4 Section 4

Here's today's idiom: "**like two peas in a pod**." Peas in one pod look the same! So when two people are always together, we say they are **like two peas in a pod**. Listen: Pip and Pop are two penguin chicks. They waddle together, nap together, and lose their feathers on the same day. "You two are **like two peas in a pod**!" laughs their mother.

今天的俚语是"like two peas in a pod"（像豌豆荚里的两颗豌豆）。同一个豆荚里的豌豆看起来一模一样！所以当两个人总是在一起时，我们就说他们像豌豆荚里的两颗豌豆。听这个小故事：Pip 和 Pop 是两只企鹅宝宝。它们一起摇摇摆摆地走路，一起打盹，还在同一天换掉羽毛。"你们俩真像豌豆荚里的两颗豌豆！"它们的妈妈笑着说。

5 Section 5

Let's think about our stories. A penguin builds a nest stone by stone, and a koala's fingers carry prints like ours. Two questions. First: what gift would you bring to ask a friend to build with you? Second: what do your **fingerprints** help you do? Talk about it with your family!

我们来想想今天的故事。企鹅一块石头一块石头地筑巢，考拉的手指上带着和我们一样的纹路。两个问题。第一：如果你想请一位朋友和你一起搭建东西，你会带什么礼物去？第二：你的指纹能帮你做什么？和家人聊聊吧！

6 Section 6

That's all for today, young explorers. Remember: a small stone can start a family, and your fingers carry a wonder like a koala's. Stay curious, and keep exploring. See you tomorrow morning!

今天的节目就到这里，小小探险家们。记住：一颗小石头可以开启一个家庭，你的手指上也藏着一个像考拉一样的奇迹。保持好奇心，继续探索吧。明天早上见！

🔬 Part 4：长难句深度拆解与练习

经典原句：

Its ridges **help** it **hold** smooth branches and **pick** soft leaves, **like** your fingerprints **help** you **hold** a pencil.

保姆级结构拆解：

- help + 宾语 + 动词原形：help it hold 里，help 后面跟宾语 it（指考拉），再跟一个不带 to 的动词原形 hold，意思是"帮助它握住"。记住：help 后面的第二个动词不加 to，这是固定搭配，读到 help 就要往后找"帮谁 + 做什么"。
- 并列动词 hold and pick：一个 help 可以管两个动作——hold smooth branches and pick soft leaves，第二个动词 pick 同样不加 to，因为它和 hold 一起被 help 管着。and 前后两个动词形式要一致，都是原形。
- like + 句子表比较：句尾 like your fingerprints help you hold a pencil，like 后面跟一个完整的句子，意思是"就像你的指纹帮你握住铅笔一样"。拿你熟悉的东西作比较，一下子就明白了考拉纹路的用处。
- 整句逻辑链：**纹路有什么用（help...hold and pick）→ 拿你熟悉的东西作比较（like...）**。一句话讲清了考拉指纹的本领。

句型练习（练的就是上面拆解的三个知识点）

A. help + 宾语 + 动词原形：选出正确的词填入空格

1. Mom ___ me carry the bag. (helps)

2. The teacher ___ us read the story. (helps)

B. like + 名词表比较：选出正确的词填入空格

1. He swims ___ a fish. (like)
2. She sings ___ a bird. (like)

C. 并列动词 and：选出正确的词填入空格

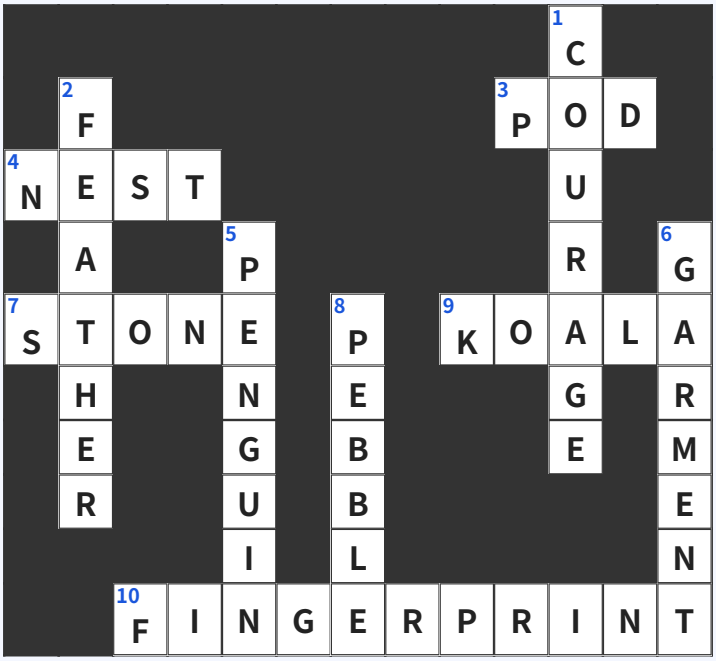

1. We sing ___ dance together. (and)
2. The koala sleeps ___ eats all day. (and)

D. 翻译练习：把这两句译成中文（不提供译文，自己试着写）

1. The ridges help the koala hold branches and pick leaves.
2. The penguin builds its nest stone by stone, like a builder builds a house.
