1 Section 1

Hello, young explorers, and welcome back to Michael's Morning Listening! Today we meet two **awesome**（了不起的） surprises: grandparent gamers who play like pros, and lightning hotter than the surface of the Sun. Ready? Let's go!

你好，小小探险家们，欢迎回到 Michael 的早听晚读！今天我们要认识两个了不起的惊喜：像职业选手一样打游戏的爷爷奶奶玩家，和比太阳表面还热的闪电。准备好了吗？出发吧！

2 Section 2

In Japan, there is a senior esports team called the Matagi Snipers（日本老年电竞战队）. Every player is over sixty years old. The oldest is seventy-five, and the average age is sixty-seven. They play a team shooting game called VALORANT（一款团队射击游戏）, and they practice together on weekday afternoons.

在日本，有一支老年电竞战队，叫作 Matagi Snipers。每一位队员都超过六十岁。最年长的队员七十五岁，平均年龄六十七岁。他们玩一款叫作 VALORANT 的团队射击游戏，每个工作日的下午一起练习。

At first, many players did not even know how to use a computer. Their coach **instructed**（指导了） them step by step, starting with how to turn the machine on. But they did not give up. They practiced hard and grew stronger after every lost round.

一开始，许多队员甚至不知道怎么用电脑。他们的教练一步一步地指导他们，从怎么开机开始教起。可是他们没有放弃。他们努力练习，每输一局之后都变得更强。

Then came the big test: a match against a senior team from Malaysia（马来西亚）. The Japanese team played calmly, with clever teamwork. Their win was **valid**（正当有效的） — no cheating, just skill. "Do not **choke**（掉链子） under pressure," their coach told them, and they did not. One player was **absent**（缺席的） that day, but the team still won two games to one!

然后，大考验来了：和一支来自马来西亚的老年战队比赛。日本队打得沉着，配合巧妙。他们的胜利是实至名归的——没有作弊，全凭本事。“压力之下不要掉链子，”教练告诉他们，而他们真的没有掉链子。那天有一位队员缺席了，但全队还是以二比一赢下了比赛！

Senior gaming is growing everywhere. In Taiwan（台湾）, over three hundred and fifty players over fifty-five joined a senior esports contest. The oldest player there was eighty-eight! So remember: games are not only for the young — with patience and practice, grandpas and grandmas can be **awesome** players too.

老年电竞正在各地兴起。在台湾，三百五十多位五十五岁以上的选手参加了一场老年电竞比赛。最年长的选手已经八十八岁了！所以记住：游戏不只是年轻人的事——只要有耐心、多练习，爷爷奶奶也能成为了不起的选手。

3 Section 3

Now look up at a summer storm. A lightning bolt flashes across the sky, and a moment later comes thunder. Here is the amazing fact: the air around a lightning bolt can reach about thirty thousand degrees — about five times hotter than the surface of the Sun, which is only about five thousand five hundred degrees!

现在，抬头看看夏天的暴风雨。一道闪电划破天空，片刻之后就传来了雷声。这里有一个惊人的事实：闪电周围的空气可以达到大约三万度——大约是太阳表面的五倍，而太阳表面只有大约五千五百度！

How does it happen? Inside a storm cloud, tiny ice crystals crash into each other again and again, building up electric **charge**（电荷）, like rubbing a balloon on your hair. When the **charge** grows too big, it has to escape. It rushes down to the ground in a flash — and that flash is lightning.

这是怎么发生的呢？在暴风云里，微小的冰晶一次又一次地相互碰撞，积累起电荷，就像把气球在头发上摩擦一样。当电荷变得太大时，它必须释放出来。它猛地冲向地面，化作一道闪光——那就是闪电。

The flash is so hot that it turns the air around it into **plasma**（等离子体）, a super-hot gas. For a tiny moment, the flash **exposes**（照亮） the whole sky. Then the super-hot air expands fast, and that expansion is the thunder you hear. Scientists use **delicate**（精密的） instruments to measure lightning. They say one flash lasts less than a second — but in that second, it is hotter than the Sun's surface!

闪电非常热，能把周围的空气变成等离子体，一种超高温气体。有一瞬间，闪光照亮了整个天空。接着，超高温的空气迅速膨胀，那种膨胀就是你听到的雷声。科学家们用精密的仪器测量闪电。他们说，一道闪电持续不到一秒——但在那一秒里，它比太阳表面还要热！

Of course, the Sun's center is far hotter than any lightning bolt. But the part of the Sun we see — its surface — is cooler than a lightning flash. So next time you see lightning, remember: you are watching sky fire, hotter than sunshine itself.

当然，太阳的中心比任何闪电都要热得多。但是我们看到的太阳的那一部分——它的表面——却比一道闪电要凉。所以下次你看到闪电时，记住：你正在看天上的火，比阳光本身还要热。

4 Section 4

Here's today's idiom: '**hit the road**（出发，上路）.' When you **hit the road**, you start a trip — you leave and go! Here's an example: 'The senior team **hit the road** early in the morning to play their match in another city.' When did you last **hit the road** for something exciting?

今天的俚语是“hit the road”（出发，上路）。当你 hit the road 时，你就开始了一段旅程——你离开，出发了！举个例子：“老年战队一大早就出发了，要去另一个城市打比赛。”你上一次为了什么激动人心的事而出发，是什么时候？

5 Section 5

Let's think about our stories: grandparent gamers, and lightning hotter than the Sun's surface. First: if your grandparents **hit the road** to play in a game contest, which game would you teach them first? Second: lightning is hotter than the Sun's surface but lasts less than a second — why does thunder come after the flash, not at the same time? Talk about it with your family!

我们来想想今天的故事：爷爷奶奶玩家，和比太阳表面还热的闪电。第一：如果你的爷爷奶奶要出发去参加游戏比赛，你会先教他们玩哪款游戏？第二：闪电比太阳表面还热，却持续不到一秒——你觉得为什么雷声总是在闪光之后才来，而不是同时到来？和家人聊聊吧！

6 Section 6

That's all for today, young explorers. Be brave like the senior gamers — and when it is time for your next adventure, just **hit the road**! See you tomorrow!

今天的节目就到这里啦，小小探险家们。像老年玩家一样勇敢——当你下一次冒险的时候到了，就出发吧！明天见！

🔬 Part 4：长难句深度拆解与练习

经典原句：

When the **charge** grows too big, it has to **escape**.

保姆级结构拆解：

- When the charge grows too big 是**时间状语从句**：When（当……的时候）+ 句子，放在句首，先告诉你“什么时候”——当电荷变得太大的时候。英语里这种时间状语可以前置，让句子先有时间背景，再出主句。
- has to escape 是**have to 表必要**：have to + 动词原形，表示“必须、不得不”。电荷太大，就“不得不”释放出来——不是想不想的问题，是非做不可。
- grows too big 是**程度结构**：too（太）+ 形容词 big，表示程度超过了界限。电荷不是“有点大”，而是“太大了”，大到装不下，所以才要释放。
- 整句逻辑链：**时间（电荷太大时）→ 必要（不得不）→ 动作（释放出来）**。一句话里藏着时间从句、have to 和程度结构三个机关。

句型练习（练的就是上面拆解的三个知识点）

A. When 时间状语从句：用括号里的词补全

2. The team _____ practice every week. (has to)

C. 介词短语：用括号里的词补全

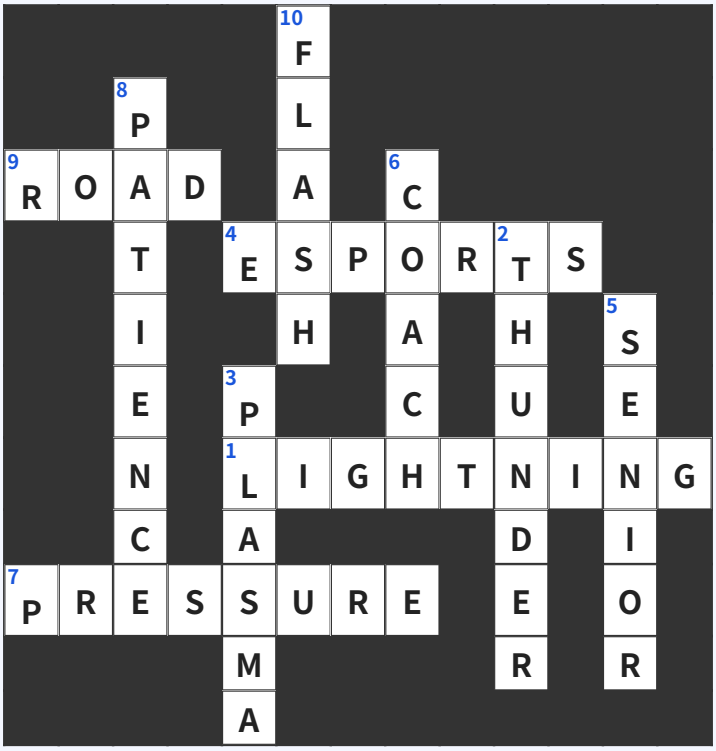

1. They practice together _____ weekday afternoons. (on)
2. Do not choke _____ pressure. (under)

D. 翻译练习：把这两句译成中文（不提供译文，自己试着写）

1. When the charge grows too big, it has to escape.
2. With patience and practice, grandpas and grandmas can be awesome players too.
