🎙️ Michael的早听晚读

Vol.03 · 晚读 PDF 核心教研讲义

本期主题：伪装鱼 Snuffleupagus 🐟

与会算数的长颈鹿 🦒

早听练耳朵，晚读练内功。

先精读，再记词，最后自测——闭环完成！

📖 Part 1：双语精读对照

以下为本期男主播朗读的全部英文原文（共 6 段），逐段配中文翻译。

1 开场白

> Welcome back to Michael's Morning Listening! Today we have two animal superstars for you: a fish that dresses up like a Muppet, and a giraffe that might be better at math than you are. Let's dive in!

欢迎回到 Michael 的早听晚读！今天有两位动物明星要介绍给你：一条打扮成布偶的小鱼，和一只数学可能比你还好的长颈鹿。让我们潜入今天的故事吧！

2 伪装鱼 Snuffleupagus

> Have you ever seen a fish that looks like a character from Sesame Street? Scientists have just given an official name to a very strange little fish — and they named it after Mr. Snuffleupagus, Big Bird's big, shaggy best friend!

你见过长得像《芝麻街》角色的鱼吗？科学家刚刚给一条非常奇怪的小鱼起了正式名字——用的就是大鸟那个毛茸茸的好朋友、Snuffleupagus 先生的名字！

> The fish is called Solenostomus snuffleupagus. It is only about one and a half inches long — small enough to sit on your fingertip. It is a type of ghost pipefish, a cousin of seahorses. But this one is special: its whole body is covered in long, shaggy skin threads that look just like fur. Put it next to a picture of Snuffleupagus, and you cannot unsee the **resemblance**!

这种鱼叫 Solenostomus snuffleupagus。它只有约一英寸半长——小到能停在你的指尖上。它是一种幽灵管鱼，是海马的亲戚。但这条很特别：全身覆盖着又长又乱的皮肤丝，看起来就像毛发。把它和 Snuffleupagus 的照片放一起，你就再也忘不掉这种相似了！

> Here is the cool part: those shaggy threads are not for keeping warm. They are a **disguise**! The fish lives on coral reefs, where red, hair-like algae floats in the water. Its shaggy body looks exactly like that algae, so hungry hunters swim right past. It is like wearing an **invisibility cloak** made of seaweed!

最酷的部分来了：那些毛茸茸的丝不是用来保暖的，而是伪装！这种鱼生活在珊瑚礁，那里的海水中漂浮着红色发丝般的海藻。它毛茸茸的身体看起来和海藻一模一样，饥饿的猎手就直接游过去了。这就像穿了一件海藻做的隐形斗篷！

Scientists first photographed this fish more than twenty years ago. It took them two whole decades of searching to prove it was a brand-new species. Good things come to those who wait — even in science!

科学家二十多年前就第一次拍到了这种鱼。但他们花了整整二十年寻找，才证明它是一个全新的物种。好事多磨——连科学研究也不例外！

3 长颈鹿的数学

Now let's meet an animal famous for its long neck — but today we are going to talk about its brain instead.

现在来认识一种以长脖子闻名的动物——但今天我们要聊的是它的大脑。

At a zoo in Barcelona, Spain, scientists wanted to test whether giraffes can do math. They showed four giraffes some boxes with carrots inside — a giraffe's favorite snack. Here is how the game worked. The scientist put carrots into two boxes where the giraffes could see them, then closed the boxes. Next, he secretly moved more carrots into one of the closed boxes. The giraffes could not see inside anymore. Then he asked them to choose: which box has more carrots now?

在西班牙巴塞罗那的一家动物园，科学家想测试长颈鹿会不会算数。他们给四只长颈鹿看了几个装着胡萝卜的盒子——胡萝卜是长颈鹿最爱的零食。游戏规则是这样的：科学家先把胡萝卜放进两个盒子，让长颈鹿看清楚，然后盖上盖子。接着，他偷偷把更多胡萝卜放进其中一个盖好的盒子。长颈鹿再也看不到里面了。然后他让它们选：现在哪个盒子里的胡萝卜更多？

To get it right, the giraffes had to remember the first amounts, then add the new carrots in their heads — without ever seeing the final pile. And guess what? They picked the right box about sixty-eight times out of a hundred — much better than random guessing! Two giraffes, Nuru and Njano, were the star students.

要选对，长颈鹿得记住最初的数量，再在脑子里加上新放进去的胡萝卜——全程看不到最终的样子。猜猜结果？它们一百次里选对了约六十八次——比瞎猜强多了！其中两只叫 Nuru 和 Njano 的长颈鹿是班里的明星学生。

But here is the twist: the giraffes were good at addition, but terrible at **subtraction** — exactly like most human kids! So the next time math homework feels hard, remember: even a giraffe finds **subtraction** tricky.

但转折来了：长颈鹿加法很在行，减法却一塌糊涂——和大多数人类小孩一模一样！所以下次觉得数学作业难，记住：连长颈鹿都觉得减法棘手。

This discovery is important because it shows that number skills are not just for humans, monkeys, and parrots. The animal kingdom is full of secret mathematicians!

这个发现很重要，因为它说明数数本领不只是人类、猴子和鹦鹉的专利。动物王国里藏着好多秘密数学家！

4 今日俚语

Here's today's idiom: "**stick your neck out**." It means to take a risk, or to be brave enough to do something difficult. For example: "She stuck her neck out and shared her idea in front of the whole class." Just like a giraffe stretches its long neck to reach the highest leaves, when you **stick your neck out**, you reach for something that others are afraid to try!

今日俚语："stick your neck out"，意思是冒险、勇敢去做困难的事。比如："她鼓起勇气，在全班面前分享了自己的想法。" 就像长颈鹿伸长脖子去够最高的树叶，当你 stick your neck out，你就在尝试别人不敢做的事！

5 结束语与互动问题

That brings us to the end of today's show! Before you go, here's a question: If you could have one superpower from any animal — **camouflage** like the ghost pipefish, or a giraffe's long neck — which would you choose, and what would you do with it?

今天的节目就到这里！走之前留一个问题：如果你能拥有一种动物的超能力——像幽灵管鱼一样隐身，或者像长颈鹿一样有长脖子——你会选哪个？用来做什么？

6 告别

> Have a wonderful day, and see you tomorrow morning!

祝你有美好的一天，明天早上见！

📚 Part 2：核心词汇

stick your neck out /stɪk jɔː nek aʊt/ (习语) 冒险；勇于尝试

今日俚语必背

*Example: She **stuck her neck out** and shared her idea in front of the whole class.*

camouflage /ˈkæməflɑːʒ/ (n./v.) 伪装

趣味词汇

*Example: Its shaggy body is a perfect **camouflage** on the coral reef.*

resemblance /rɪˈzembləns/ (n.) 相似之处

*Example: Put it next to Snuffleupagus, and you cannot unsee the **resemblance**!*

disguise /dɪsˈgaɪz/ (n./v.) 伪装；假扮

*Example: Those shaggy threads are not for warmth. They are a **disguise**!*

subtraction /səbˈtrækʃn/ (n.) 减法

学科词汇

*Example: The giraffes were good at addition, but terrible at **subtraction**.*

invisibility cloak /ɪnˌvɪzəˈbɪləti kləʊk/ (n.) 隐形斗篷

趣味词汇

*Example: It is like wearing an **invisibility cloak** made of seaweed!*

✏️ Part 3：阅读理解自测

A. 标题配对（Match the headings）

请为 Part 1 的六个段落选择最合适的标题：

1. Paragraph 1 → _____
2. Paragraph 2 → _____
3. Paragraph 3 → _____
4. Paragraph 4 → _____
5. Paragraph 5 → _____
6. Paragraph 6 → _____

Headings:

A. 伪装大师：穿海藻隐形斗篷的小鱼
B. 今日俚语：stick your neck out
C. 开场：今天的两位动物明星
D. 互动时间：选一种动物超能力
E. 告别：明天早上见
F. 长颈鹿会算数：加法行，减法不行

B. 单项选择（Multiple Choice）

1. 这种小鱼为什么叫 Snuffleupagus?
   A. 它的叫声像 Snuffleupagus
   B. 它长得像《芝麻街》的 Snuffleupagus
   C. 它是 Snuffleupagus 发现的
   D. 它住在芝麻街

2. 小鱼身上毛茸茸的丝有什么用?
   A. 保暖
   B. 吸引配偶
   C. 伪装成海藻躲避猎手
   D. 帮助游泳

3. 长颈鹿在实验中表现如何?

A. 加减法都很差

B. 加法好，减法差

C. 减法好，加法差

D. 完全靠瞎猜

4. "stick your neck out" 是什么意思?

A. 把脖子缩回去

B. 冒险、勇敢去做

C. 伸懒腰

D. 低头认错

🔬 Part 4：长难句深度拆解与仿写

经典原句：

To get it right, the giraffes **had to remember the first amounts**, **then add the new carrots in their heads** — without ever seeing the final pile.

保姆级结构拆解：

- To get it right 是**不定式作目的状语**，表示"为了选对"。to do 放在句首表目的，是科普英语讲实验设计的常用开场。
- 主句 the giraffes had to remember... 中，had to 表示"不得不"，强调这是完成任务的必要条件。
- then add the new carrots in their heads 与 remember 并列，then 标出先后顺序：**先记住 → 再心算**。注意 in their heads（在脑子里）这个介词短语，生动点出"看不见、靠心算"的关键。
- 破折号后的 without ever seeing the final pile 是**介词短语作伴随状语**，补充说明实验的难度：全程看不到最终结果。ever 在这里加强语气，相当于"一次都没见过"。
- 整句逻辑链：**目的（为了选对）→ 步骤一（记住数量）→ 步骤二（心算相加）→ 难度（看不见结果）**。一句话把实验规则讲得明明白白，是说明文"讲规则"的万能句型。

句型仿写：

To win the game, the players had to memorize the map, then find the hidden treasure in their minds — without ever opening their eyes.

（为了赢得比赛，选手们得先记住地图，再在脑子里找到藏着的宝藏——全程不许睁眼。）

✅ Part 5：答案与解析

A. 标题配对：

1 → C（开场：今天的两位动物明星）

2 → A（伪装大师：穿海藻隐形斗篷的小鱼）

3 → F（长颈鹿会算数：加法行，减法不行）

4 → B（今日俚语：stick your neck out）

5 → D（互动时间：选一种动物超能力）

6 → E（告别：明天早上见）

B. 单项选择：

1 → **B**。原文：they named it after Mr. Snuffleupagus（以 Snuffleupagus 命名），原因是 you cannot unsee the resemblance（长得太像了）。

2 → **C**。原文：They are a disguise! ... so hungry hunters swim right past（是伪装！让猎手直接游过去）。注意迷惑项 A：原文明确说 not for keeping warm（不是为了保暖）。

3 → **B**。原文：good at addition, but terrible at subtraction（加法在行，减法一塌糊涂）。

4 → **B**。原文：It means to take a risk, or to be brave enough to do something difficult（意思是冒险，或勇敢去做困难的事）。

🌟 全部答对就是今日 MVP！

明天早上同一时间，继续《Michael的早听晚读》～
