📖 Part 1：双语精读对照

以下为本期男主播朗读的全部英文原文（共 6 节：Section 1–6），逐节配中文翻译。

1 Section 1

Hello, young explorers, and welcome back to Michael's Morning Listening! This is our sixteenth show together! Today we meet a bridge built from toy bricks — the biggest LEGO（乐高） build on Earth. Then we dive back in time to meet a swimmer older than the first trees. A toy bridge and an ancient shark! Let's go!

你好，小小探险家们，欢迎回到 Michael 的早听晚读！这是我们在一起的第十六期节目啦！今天我们来认识一座用玩具积木搭成的桥——它是地球上最大的乐高建筑。然后我们潜入时光深处，去见一位比第一批树木还要古老的游泳者。一座积木桥，一条远古鲨鱼！出发吧！

2 Section 2

Our first hero stands in London（伦敦）: the famous Tower Bridge（塔桥）, copied in LEGO bricks! They used five million, eight hundred and five thousand, eight hundred and forty-six bricks. It is the largest LEGO sculpture ever built: forty-four metres long and thirteen metres tall! Media cameras came from around the world, and boats sailed past below. Here is its silliest **appeal**（吸引力）: lay the bricks in one line, and they stretch from London to Paris（巴黎）!

我们的第一位主角就站在伦敦：它就是著名的塔桥，只不过是用乐高积木复制出来的！搭建它一共用掉了五百八十万五千八百四十六块积木。它是人类搭过的最大的乐高雕塑：四十四米长，十三米高！全世界的媒体摄像机都跑来拍它，船只就从它下方的河面开过。它最搞笑的魅力是：要是把这些积木排成一条线，能从伦敦一直排到巴黎！

LEGO builders hold another record: the world's longest LEGO bridge. Engineers built one thirty-four metres long, from more than two hundred and five thousand bricks — with no glue at all! Its middle **span**（桥跨） hung almost seventeen metres across the air. Every brick had to click perfectly: one loose brick could **damage**（损坏） the whole bridge.

乐高玩家还握着另一个纪录：世界上最长的乐高桥。工程师们用二十万五千多块积木，搭出了一座三十四米长的桥——一滴胶水都没用！它中间的桥跨悬在空中，伸展了将近十七米。每一块积木都必须严丝合缝地扣好：一块松了，整座桥都可能受损。

Then came an **awkward**（尴尬的；棘手的） moment. As the deck grew heavier, one **anchor**（锚） that held the cables began to tilt! The builders held their breath. Quickly, they piled heavy weights onto the **anchor** and pressed it firm. When the last plate clicked into place, a huge cheer **erupted**（爆发）. A bridge is a quiet service to a city: it carries everyone across, asking nothing back.

接着，一个让人捏把汗的尴尬时刻来了。随着桥面越来越重，一只固定钢缆的锚开始倾斜了！搭建的人们屏住了呼吸。他们赶紧往锚上堆压重物，把它重新压稳。当最后一块板咔哒一声扣好的时候，一阵巨大的欢呼爆发了。说到底，一座桥就是一座城市默默的服务者：它载着所有人过河，却从不求回报。

3 Section 3

Now dive with me into the deep past. Here is a fact that **astonishes**（令人吃惊） even scientists: sharks are older than trees! The oldest shark **fossils**（化石） are not bones or teeth, but tiny scales in rocks four hundred and fifty million years old. The **significance**（重大意义） of those scales is enormous: sharks already swam when the land had no forests — only mosses a few centimetres tall, and no shady tree on any beach.

现在，跟我一起潜入深深的过去吧。有一个事实，连科学家都会惊叹：鲨鱼比树木还要古老！最古老的鲨鱼化石不是骨头也不是牙齿，而是岩石里的小小鳞片，它们已经有四亿五千万年了。这些鳞片的意义非常重大：早在陆地上一片森林都没有的时候，鲨鱼就已经在海里游了——那时只有几厘米高的苔藓，任何一处海滩上都没有一棵遮阴的树。

The first true trees grew about sixty million years later. One, called Wattieza（瓦蒂萨树（远古树木））, looked like a giant fern on a stick. So for sixty million years, sharks swam almost alone as kings of the sea, while the world above the waves lay quiet and bare, as if fast asleep.

第一批真正的树，大约在六千万年之后才长出来。其中一种叫瓦蒂萨树，长得像一棵站在棍子上的巨型蕨类。所以在整整六千万年里，鲨鱼几乎是独自称霸海洋的王者，而海浪之上的世界安安静静、光秃秃的，仿佛沉睡了一样。

Since then, sharks have survived five great extinctions. Sea monsters rose and fell, **dynasties**（王朝） of dinosaurs came and went — and the sharks just kept swimming. Even their skin is a tool: tiny tooth-like scales cover it, so rough that sailors once stretched it over a board to shave wood smooth, like sandpaper. So remember: a shark is a design older than every forest on Earth!

从那以后，鲨鱼挺过了五次大灭绝。巨大的海怪兴起又衰落，恐龙的王朝来了又去——而鲨鱼，只是继续游它自己的泳。连鲨鱼的皮肤都是一件工具：上面布满像小牙齿一样的鳞片，粗糙得不得了，水手们曾经把鲨鱼皮绷在木板上，像砂纸一样磨光木头。所以记住：鲨鱼，是一套比地球上所有森林都要古老的设计！

4 Section 4

Here's today's idiom: "**steal the show**." Imagine a stage with one main star. If a small, funny actor suddenly gets all the cheers, we say he **stole the show**! It means winning all the attention and praise. The LEGO bridge **stole the show** in London; today the shark steals it back. Here's an example: "My little sister sang one song and **stole the show**." Who steals the show in your class?

今天的俚语是“steal the show”。想象一个舞台，上面有一位主角。如果一个小小的、搞笑的演员突然赢得了所有的欢呼，我们就说他 stole the show（抢了风头）！它的意思是赢得全部的注意和赞美。那座乐高大桥在伦敦抢尽了风头；今天，鲨鱼又把它抢了回来。举个例子：“我妹妹只唱了一首歌，就抢走了全场的风头。”在你们班里，谁最会抢风头呢?

5 Section 5

Let's think about our stories. A toy bridge broke world records, and a fish turned out to be older than forests. Two questions for you. First: if you could build one giant LEGO thing, what would you build — a boat, a castle, or a bridge? Second: what do you think the world looked like before there were any trees? Talk about it with your family!

我们来想想今天的故事。一座积木桥打破了世界纪录，一条鱼竟然比森林还要古老。轮到回答两个问题了。第一：如果你能用乐高积木搭一样巨大的东西，你会搭什么——一条船、一座城堡，还是一座桥？第二：你觉得在还没有任何树木的时候，世界是什么样子的？和家人聊聊吧！

6 Section 6

> That's all for today, young explorers. Tonight, while you are fast asleep, a shark is still swimming its ancient rounds. Keep building, keep wondering — see you tomorrow morning!

今天的节目就到这里啦，小小探险家们。今晚，当你熟睡的时候，一条鲨鱼还在继续它古老的巡游。继续动手搭建，继续好奇探索——明天早上见！

🔬 Part 4：长难句深度拆解与练习

经典原句：

So for sixty million years, sharks **swam** almost alone **as** kings of the sea, **while** the world above the waves lay quiet and bare, **as if** fast asleep.

保姆级结构拆解：

- 主干很简单：sharks swam（鲨鱼游着）。句首的 So 是"所以"，承接上一段的结论——前面刚说完鲨鱼比第一棵树早出现六千万年，所以有了这一句。
- for sixty million years 里的 for 是**持续时间**的标志：for + 一段时间 = "持续了多久"。注意它和"为了"没关系，看到 for 后面跟时间，先想"有多久"。
- as kings of the sea 里的 as 表示**身份**："作为海洋之王"。英语里 as + 职业/身份名词，就是"以……的身份"。
- while the world above the waves lay quiet and bare 里的 while 不是"当……的时候"那么简单，它摆出**两个同时进行的对比画面**：海里鲨鱼称王，海面上却安安静静、光秃秃的。读到对比义的 while，脑子里要立刻分成左右两幅图。
- 句尾的 as if fast asleep 里，as if = "仿佛、好像"：世界并没有真的睡着，只是静得像睡着了一样。as if 后面常省略主语和 be 动词（完整是 as if it was fast asleep）。
- 整句逻辑链：**鲨鱼独游六千万年（主干 + for 标出时长）→ 以海洋之王的身份（as 标出身份）→ 与此同时陆上一片沉寂（while 摆对比）→ 静得仿佛睡着（as if 加比喻）**。一句长句，四把钥匙全在里面。
